PROFILE

Work with interesting {people, products, problems}

EXPERIENCE

AMARTHA — Jakarta · 2023 – Present

- Lead the product engineering team of Amartha as a CTO to build and scale Amartha's Lending, Funding and Payments business.
- Rebuild a lot of the infrastructure to manage growing scale and business ambitions to modern scalable infrastructure.

MEKARI — Jakarta · 2022 – 2023

- Lead the engineering team of Mekari Software as an interim CTO to support hiring of the new Incoming CTO
- Hands on in resolving some of the teething performance issues in some systems

GOJEK — Jakarta · 2018 – 2021

- Lead the Merchants engineering team as Head of Engineering to build B2B products for Gojek.
- Working across multiple teams across India, Singapore, Indonesia scaling the team and products
- Actively involved in product and drove some of the most critical decisions around building merchant super app, online/offline payment gateway consolidation, and building the promotions platform
- Helped acquire and assimilate engineers from various acquisitions like Kartuku, Midtrans, Nadipos, Moka, and Activesphere.

MIDTRANS (acquired by Gojek) — Jakarta · 2016 – 2018

- Lead the engineering team as CTO of the largest payment gateway of Indonesia.
- Working across multiple teams, defining architecture for systems to scale, expand internationally and growing team.
- Writing critical components working with individual teams including Elixir, Java, and Ruby.

BLUEJEANS — Bangalore · 2014 – 2015

- Work on the Platform team to scale the video conferencing product for the rapidly increasing usage and towards a fault tolerant global active-active architecture.
- Working across multiple projects on J2EE stack with Java, Scala, and Node.js

ACTIVESPHERE (acquired by Gojek) — Bangalore · 2010 – 2014

- Cofounded and built Activesphere into a world class consulting company.
- Worked with CTO's of interesting startups to build and scale their applications (for 10s of millions of users) using Ruby on Rails, Node.js and bit of Scala.
- Released and contributed a lot of Open Source (redis-proxy, nodetoolbox, hat.js).
- Built (unsuccessfully) products like BuildCop (hosted Continuous Integration server) and YourHires (hosted Recruitment management software)

THOUGHTWORKS — Bangalore, Beijing, Chicago · 2004 – 2010

- Worked with enterprise customers on a number of large sized (codebase, teams) projects on various platforms (Java, .Net and Rails)
- Worked in Beijing, to lead the delivery of the first big project out of new China office

- Contributed to a few Open Source software (CC.net)

AZTEC SOFTWARE (now Mindtree) — San Francisco, Bangalore · 2001 – 2004

- Worked with some interesting startups in the Bay area, working mostly in Java
- Lead the team in building the SqliMail product for Microsoft SQL Server. Mostly in C#

TEKTRONIX — Bangalore, Beaverton · 1998 – 2001

- Built software of 'Profile' Broadcast Video server, vxWorks RTOS backend and Windows NT front end. Most work was in C++ and Smalltalk

EDUCATION

BVM Govt. College of Engineering, VV Nagar — BE (Computers), 1993 – 1997

INTERESTS

- Distributed Systems and Databases (currently writing my own distributed database)
- Programming Languages (I am proficient in Ruby, JavaScript, Java, Erlang, Elixir, and bit rusty with Scala, Racket (Scheme), C#, SML, Haskell, Smalltalk, and C++)

SPEAKING

I have given a few conference talks: RubyConf India (2010, 2014), JSFoo (2012, 2013), DevOpsDays (2012), RedisConf (2014), but I am a hopeless speaker.

OTHER INTERESTS

- **Running:** I do road and trail running, esp. marathons to 100km ultras (most recent Solang Sky Ultra 2024)
- **Cycling:** I do multi day brevets and tours (Tour of Nilgiris (2009, 2013), Tour of Tamilnadu (2012), Manali-Leh (2013) and 1200km Brevets.
- **Traveling:** I am only Antarctica away from traveling on all continents
